

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE

TO USE INTELLIGENTLY, STUDY CLOSELY

ANY unintelligible message received will be repeated and CORRECTED by the Telegraph Companies without charge. EVERY message showing an apparent error should INVARIABLY be repeated.

On the Thumb Index page of Letters and Telegrams we give the Morse Alphabet, and common errors through similarity of letters in Telegraphy. Reference to this page when in trouble with a telegram, will often help you out.

The Modern Economy Code is issued primarily to make use of the short five letter Cipher Words, that have proven such a success in other Codes issued by us.

The enormous saving effected through being able to wire two Cipher Words as one, must appeal to all good business men.

The Modern Economy Code has taken care of the many changes that have taken place in the business during the last five years, and through the addition of thousands of words and sentences now appearing under the head of "General Conversation," we claim it to be the most complete Code ever issued.

These General Conversation sentences are especially adapted to taking care of matter that is not covered in any Code, the uncommon things which, however, happen with great frequency and then require telegrams of great length; by the use of these an entire business letter may be turned verbatim into Code words.

It will also be found of great convenience to people who do not familiarize themselves with a Code, as they can simply use the "General Conversation" as they would a dictionary.

By our Abbreviation System we are able to dispense with the long perplexing tables, but a great deal of matter is now condensed on a single page, making the work of ciphering and deciphering much easier and quicker.

Some people may at first consider the arrangement complicated, but actual use will prove it the simplest method devised.

We now wire in 5 letter words what formerly required 9 or 10 letters, consequently, the liability to errors is reduced 45-50%, and all who have used our Simple Combination for Car Numbers in a former issue, know how few errors were made in transmission, and the same system is now applied to all the Cipher Words in this Code.

EXPLANATORY

DASHES. Whenever a dash (—) appears “at the beginning” of a sentence or phrase, it is to be understood that the word or name supplanted by the dash shall precede such sentence.

When a dash appears “in the body of the sentence,” the missing word should immediately follow the cipher word.

When two dashes appear, both words should follow.

When a dash appears in place of the cipher word it will always be found that reference is given to a page number on which the phrase will be found repeated at the head of a column and where the proper cipher word may be found.

PARENTHESIS. Whenever a word or a letter appears in parenthesis—(we), (is), (s)—it is to be understood that the sentence may be used “with” or “without” such word or letter.

As far as possible the various subjects have been confined to cipher words beginning with certain letters, as follows:

Prices and Numerals begin with the letter.....	A
Offerings, Buying, Selling, etc., begin with the letter.....	B
Consignments, Rejections, Market, begin with the letter....	C
Shipping, Railroads and Cars begin with the letter.....	D
Routing Combinations begin with the letter.....	E
Diverting, Offering and Shipping with certain dates begin with the letter	F
General Conversation begins with the letter.....	G
Cheese, Butter, Eggs and Poultry begin practically all with the letter	H
Dried Fruit and kindred subjects begin with the letters I & J	
Vegetables begin with the letters	K & L
Citrus Fruits begin with the letters	M, N, P & R
Deciduous Fruits begin with the letters	S & T

By this arrangement errors in transmission may generally be traced down to the subject and corrected without the delay caused by repetition of the message.

GENERAL CONVERSATION. The part under this heading contains over a million sentences in combination, and under the old style of arranging Codes several large volumes would be required to cover what these few pages do.

Handle it as you would a dictionary, and you will find practically everything required in business correspondence.

All verbs are given with their various endings so that past, present and future tense may be expressed, as in the word “abandon,” the same cipher word stands for abandons, abandoned and abandoning. The preceding or following words will show what the proper ending should be.

INDEX

The ALPHABETICAL INDEX given below, while enumerating all subjects and commodities and the headings of the various paragraphs, will lose a good deal of its importance through the MARGINAL INDEX. Although the latter, being limited to certain space, is necessarily restricted to only the LEADING HEADINGS or MAIN DIVISIONS, parties using the Code regularly will soon know what the various headings comprise, particularly if paying attention to the pages on which the "Marginal Index" is printed and which always contain a complete specified index of all that pertains to the subjects thereon mentioned.

Instructions

Always have 5 letters in a Cipher Word. Add the Terminal (two letter syllable) on the right of the three letter syllable on the left of page, as follows:

Are awaiting reply
 to ours of the =buk
 22nd = lb
 bukib

If you want to use "Week after next" or "This month," add the syllable "ab" standing for blank, to the respective 3 letter syllable, as:

bymab=Week after next
 bykab=This month

April =bow
 1st week in = ll
 bowli

Again, if you want to use from the Terminals, Middle of next week—"po" you must precede it by the 3 letter syllable "bop" (standing for blank) making the word "boppa."

GENERAL CONVERSATION:

The following pages under this heading will be found extremely useful and valuable, as they supply what all Codes have heretofore lacked, giving the users an opportunity to translate letters verbatim into Code words, as well as finding Code words for such words as have continually been overlooked by Code compilers, or that could not be classified under any particular heading, and even when in the Code, the user could not find them readily. Our arrangement of this most important addition to the Code, makes it possible to turn to anything wanted at once, simply following the alphabetical order. All Code users are frequently obliged to send messages that are out of the ordinary business routine, particularly when wiring information or instructions to associates or agents; that is the time when they find all Codes totally inadequate, or they are in too great a hurry to look for what they want; this is where our General Conversation Sentences will help them out of their difficulties.

Instructions

Combine the three letter syllable with the terminal (2 letter syllable) for instance:

Dairy extras =hap
 Illinois = an
 hapan

Process seconds=hel
 65 tubs = ib
 helib

The terminal "ab" is blank; should you wish to wire:

"Creamery Extras" without designating location, use the three letter syllable "hac," adding to this the terminal "ab."

Instructions

Combine the three letter syllable with the terminal (two letter syllable), for instance:

Seedless Muscatels Standard=ipd
 3 Crown 20-lb. boxes = eb
 ipdeb

When you desire to wire, for instance, L. M. Pacific, without designating size and style of packing, use the letters "ins" and add thereto the terminal "ab," standing for blank, making the word "insab."

And if you wish to wire, say, 4 Crown Bags without any specific variety, precede the terminal "ek" by the letters "inp," standing for blank, making the word "inpek."

Instructions

Combine the three letter syllable with the terminal (two letter syllable), for instance:

No. 1 White Honey =jim
 34-lb. sections glass = ag
 front = ag
 jimag

If required to wire No. 1 White without designating style of package, add the terminal "ab," standing for blank, making the word "jimab."

Terminals

ab
 ac 33 lb. sections glass front
 ad 33 lb. sections wood slide
 af 38 lb. sections solid cases
 ag 34 lb. sections glass front
 ak 24 lb. sections wood slide
 al 24 lb. sections solid cases
 am 12 lb. sections glass front
 an 13 lb. sections wood slide

Instructions

Combine the three letter syllable with the terminal (two letter syllable) for instance:

Choice per bushel	
bulk	=kas
Red Globe	= fe
	kasfe

If required wiring "Fancy bulk per 100 lbs." without designating variety, use the 3 letter syllable "kag." and add thereto the terminal "ab," standing for blank, making the word "kagab," and if you wish to wire, for instance, "Louisiana Red," alone, precede the terminal "eb" by the three letter syllable "kaf," standing for blank, making the word "kafeb."

If required to wire, for instance, "Average weight of melons 22 lbs.," without contents or weight of car, use the three letter syllable "kup," and add thereto the terminal "ab," standing for blank, making the word "kupab." Again, if desiring to wire the contents or weight of a car without giving the average weight of the melons, precede the terminal by the three letter syllable "kis," standing for blank, for instance: "kisac" means weight of car approximately 22000 lbs., "kisp" means number of melons in car approximately 1150.

Instructions

The above arrangement allows complete manifests of cars to be wired at a nominal expense, being cut down 50% over the method formerly used, and being handled very much quicker, for instance:

96s and larger	==muf
33 boxes	== fu
	=====
	muffu
126s	== mur
73 boxes	== ni
	=====
	muffumurni
	=====
150s-200s 200 and	==nam
boxes	== ab
	=====
	namab
216s and smaller	== ner
74 boxes	== nu
	=====
	namabnernu

This gives the manifest on any ordinary car in two words. Whenever there are 100 or 200 boxes of a size, the terminal "ab," standing for blank has to be used.

Instructions

Combine the three letter syllable with the terminal (2 letter syllable). for instance:

Bellefleurs =sal
Extra Fcy. 4 tier = ag

Winesaps =salag
510 Boxes =sup
= nu

In wiring variety without grade or style of packing, use the 3 letter syllable opposite such grade and add thereto the terminal (2 letter syllable) "ab," standing for blank, for instance: Newtown Pippins, "sibab."

In wiring grade or style of package without variety, precede by the 3 letter syllable "sab," standing for blank, for instance: Barrels Fancy, "sahch."

Instructions

We only give the two leading Refrigerator Lines used in trans-continental business, their numbers running not over four figures. It must be understood, though, that any Cipher Word made up from this should consist of 5 letters, for instance:

PFE 15, should be wired as
PFE 00 15, or Vabaw

SFRD 123, should be wired
as
SFRD 0 123, or Wacek

PFE 1212=Vasas
SFRD 4444=Wipip

Addenda

to

Modern Economy Code

This Addenda covers all Refrigerator Cars added to Equipment of Railroads and Car Lines since the issue of the Modern Economy Code in 1908.

HOLLINGSWORTH BLDG.

SIXTH AND HILL STS.

LOS ANGELES

:::

CALIFORNIA

FEBRUARY, 1914

This booklet should be fastened in your Modern Economy Code by Rubber Band, or other means, so it will always be with the Book, as it is now a part of the Code.

The letter "O" being used for Car in the Addenda, we suggest that notation in Red Ink be made on page 220 of the Book, as follows: "For letter "O" see page 248 of Addenda."

Add the three letter syllable (terminals) from list below to the two letter syllable standing for the thousand series of the P. F. E. and S. F. R. D. lines for your car numbers over 9999. For all four figure numbers, continue to use Page 246.
